

Digital Transformation through Innovation

Blockchain

Enhancing the **security** of CAAs national data in a number of different areas such as licensing, certification, etc.

Artificial Intelligence

Increase efficiency through AI: Now you can flag the licences that need to be reviewed and allow the other conforming licences to be approved.

Flexible Integration

ICAO Platforms: Portal for end user to continuously update their profile.

Mobile Technology

Optimizes Inspectors time: It allows Inspectors to carry out mobile inspections simultaneously.

Machine Readable Travel Documents (MRTD)

Our solution for MRTD can be implemented for Personnel Licensing mainly international Crew, local crew and other aviation professionals who require MRTD Identification and Credential Management. Our Multi factor identity management platform integrates all MRTD Specifications and standards defined by ICAO encompassing integrated latest hardware and software technologies.

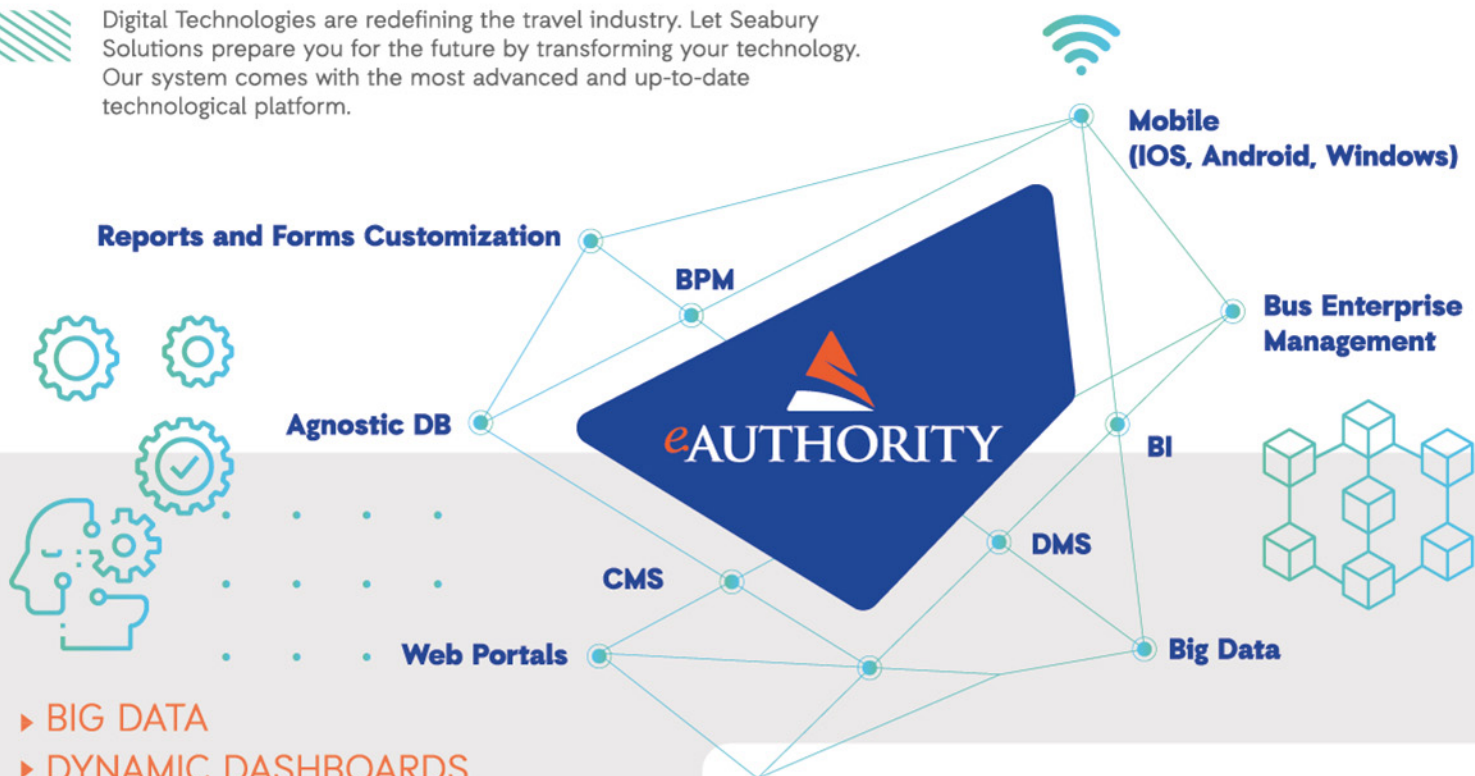

Digital Transformation Platform

BPM

Operational Advantage: Optimise Business Processes
Strategic Advantage: New Market Opportunities & Improved Customer Relationships

Digital Technologies are redefining the travel industry. Let Seabury Solutions prepare you for the future by transforming your technology. Our system comes with the most advanced and up-to-date technological platform.

- BIG DATA
- DYNAMIC DASHBOARDS
- CLOUD HOSTING

With an emphasis working exclusively in aviation software development, delivery and support, our customer base includes over 100 customer engagements spread across 45 different countries. A sample set of customers is shown here.
